## Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: in combination with other limitations of the claims, the cited prior arts fail to teach a selectable switch coupled to provide a bias signal to the pre-driver circuit wherein the pre-driver circuit produces an output voltage that is equal to the supply voltage when the bias signal is removed by the selectable switch, as recited in claims 1, 9 and 12; the cited prior arts also fail to teach logic for selecting, during an operational state (non-idle state), the at least one selectable capacitor coupled to each input of the line driver differential input to set a specified slew rate, as claimed in claim 16; the cited prior arts also fail to teach logic means for selecting the slew rate, as recited in claim 22; and the cited prior arts also fail to teach if the Tx line driver is in an operational state, producing a slew rate selection signal to a capacitor bank to select at least one capacitor of a plurality of capacitors within the capacitor bank to couple the at least one capacitor between a Tx line driver input and ground, wherein the selected at least one capacitor establishes a slew rate for the Tx line driver, as recited in method claim 27.

2. Claims 1-29 are in condition for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
